

MAGTECH DELIVERS HIGH VOLTAGE/HIGH WATTAGE DRIVERS FOR THE OUTDOOR AND INDUSTRIAL MARKET

1/5/2017 – Las Vegas, NV – Magtech Industries

Magtech Industries introduces our new line of High Wattage/High Voltage LED power supplies for outdoor and industrial applications. Designed to provide regulated power control directly to the LED modules, our line of power supplies reduce the complexity in designing outdoor LED luminaires while maximizing system performance and efficacy. The Magtech constant power and programmable LED drivers are configurable to precisely match the specific load and operating requirements.

Designed for US/Canada applications these 277 to 480 (V) input drivers are ultra-high Efficient (up to 93%) with a wide-ranging output current.

This new line of 0-10 dimmable, programmable LED drivers are available from (60 to 320 watts) and allows OEM's a quick response to their inventory needs along with the design flexibility for different applications.

- Ultra-High Efficiency (Up to 93%)
- Full Power at Wide Output Current Range (Constant Power)
- Thermal Sensing and Protection Mode
- 0-10V/PWM dimming
- Input Surge Protection: 4kV line-Line, 6kV line-earth
- All-Around protection: OVP, SCP, OTP
- Waterproof (IP67) and UL Dry/Damp/Wet Location
- Dual Stage: Active Power Factor Correction
- 5 Year Warranty

The LP Series of premium drivers are both efficient and intelligent, allowing you to create innovative, next-generation lighting systems that live up to your standards. For your next application, trust Magtech LED drivers to provide peace of mind, and reliable performance.
